Printing History

New editions of this manual will incorporate all material updated since the previous edition. Update packages may be issued between editions and contain replacement and additional pages to be merged into the manual by the user. Each updated page will be indicated by a revision date at the bottom of the page. A vertical bar in the margin indicates the changes on each page. Note that pages which are rearranged due to changes on a previous page are not considered revised.

The manual printing date and part number indicate its current edition. The printing date changes when a new edition is printed. (Minor corrections and updates which are incorporated at reprint do not cause the date to change.) The manual part number changes when extensive technical changes are incorporated.

January 1983...First Edition. This manual is the updated version of, and replaces, part number 09826-90070.

| May 1983...Update to include Pascal 2.1.

Table of Contents

Chapter 1: Getting Started

Welcome	1
What's In This Manual?	1
Other Manuals of Interest	3
Subject Quick Reference	4
Loading the System	5
A Note about SRM	5
Memory Requirements	5
The Boot ROM	5
Booting with the Original Boot ROM	6
Booting with the BOOTROM 3.0 or 3.0L	7
Time and Date Prompts	8
What If Pascal Does Not Load	10
The Keyboard and CRT	10
The CRT	10
The Type-ahead Buffer	11
The Status Indicator	11
The Keyboard	11
Typewriter Keys	12
Program Control Keys	13
System Keys	14
The Main Command Level	15
Pascal System Discs	16
Main Command Level Quick Reference	17
The Command Reference	18
eXecute	19
Initialize	20
Memory volume	21
New sysvol	23
Permanent	24
Run	25
Stream	26
User restart	28
Version	29
What	31
Initializing Mass Storage Media	33
Backing Up the Operating System	35
Peripheral Configuration Information	37
Alternate Directory Access Methods	39
Comparison of LIF and WS1.0 DAMs	39
Recommendations For Selecting Primary DAM	40
Switching Directory Access Methods	40
Moving Files Between WS1.0 and LIF Volumes	41
Moving the System Files to the System Unit	41
Naming Conventions for Boot Files	42
Mass Storage Products Supported by Pascal 2.0	44
File Interchange Between Pascal and BASIC	45

Library Management	45
GRAPHICS File	46
IO File	47
INTERFACE File	47
Adding Modules to the System LIBRARY	48
Notes and Possible Problems	49
Adding Modules to INITLIB	49
HP-IB Disc Performance Considerations	53
Setting Up the SRM System	54
Booting	54
The System Volume	54
Overview of SRM Installation	56
Determining Available Memory	57
Booting Using the Original BOOT Disc	57
Preparing Blank Discs	57
Making a New INITLIB	59
Replacing INITLIB on the New BOOT Disc	61
Rebooting with the New BOOT:	63
Creating the Required Directories and Files	63
Copying the System Files	65
The AUTOSTART File	67
The STARTUP File	68

Chapter 2: The File System

Introduction	69
How Magnetic Discs Work	70
Pascal Volumes	72
Volumes	72
Units	73
Files	75
File Naming Conventions	76
File Specifications and File Names	76
Syntax of a File Specification	76
Syntax of a Volume Identifier	77
Syntax of a Directory Path	77
Syntax of File Names	79
File Types Derived from File Names	79
File names (LIF Directory)	80
File Names (Workstation 1.0 Directory)	81
File Names (SRM System)	81
File Size Specification	81
Several Directory Organizations Allowed	81

File Name Suffixes and File Types	82
Suppressing the Suffix	83
Translating Files from One Data Type to Another	83
Wildcards	84
File Names to Avoid	85
Allowable File Names	86
How Long may a File Name be?	86
No Room on Volume	86
The Shared Resource Management System	87
Hierarchical directories	87
Notation	88
SRM Units and Volumes	88
Moving Up and Down the Hierarchy	89
Default Volume vs Current Working Directory	91
Names and Addresses on SRM	92
Your Workstation Address	92
The SRM Unit Numbers	92
Shared Disc Drive Addresses and Names	93
Syntax of a Volume Specifier	94
Names and Addresses of Shared Peripherals	94
Node Numbers	95
Fill in Your Own Map	95
Workstation Information	97
Programming With Files	98
Pascal Primitive File Operations	98
Creating New Files	98
File Position	99
The Buffer Variable	100
File States	100
Restrictions on APPEND	101
Disposing of Files	102
Opening Existing Files	102
Sequential File Operations	103
Direct Access (Random Access) Files	105
Textfile Input and Output	107
Declaring a Text File	107
Representations of a Text File	108
Formatted Input and Output	109
Reading a String or Pac from a Textfile	110
RESET, REWRITE, OPEN and APPEND	111
Debugging Programs Which Use Files	111
SRM Concurrent File Access	112
SRM Access Rights	112.2

Chapter 3: The Editor

Introduction	113
Entering the Editor	114
Creating a Text File	115
The Editor Prompt	115
A Sample Editor Session	116
Creating Text	116
Saving your File and Returning to the Editor	117
Getting Text from Other Files	118
Confirming or Aborting Commands	119
Moving the Cursor	120
Removing Text	121
Recovering Deleted Text	122
Moving and Duplicating Text	122
Changing and Altering Text	123
Formatting Text	128
Exiting the Editor and Saving the File	131
Making a Backup Copy	132
A Closer Look	133
The Cursor	133
The Screen as a Window into a File	133
Memory and File Sizes	133
Structure of Text Files	134
Using Workfiles in the Editor	135
Stream Files and the ANYCHAR Key	136
I/O Errors (Entering and Exiting the Editor)	136
Editor Commands	137
Command Syntax and Semantics	138
Adjust	139
Copy	141
Delete	143
Equals (=)	145
Find	146
Insert	149
Jump	151
Margin	152
Page	153
Quit	154
Replace	156
Set	159
Verify	163
eXchange	164
Zap	165

Chapter 4: The Filer

Introduction	167
Entering the Filer	168
The Filer Prompt	168
Filer Operations	169
A Sample Filer Session	169
Finding Out What Devices are Accessible	169
Listing a Directory	170
Getting a More Detailed Listing	171
A Few Words About Wildcards	173
Translating Text Files	173
Listing Files to the Printer and Screen	174
Copying Entire Volumes: Backup Copies	175
Creating a Directory	177
Moving Files from Volume to Volume	178
Renaming Files and Volumes	181
The Default and System Volumes	181
Changing the Default Volume	182
The System Volume	183
Removing Files	184
Leaving the Filer	185
The System Workfile (A Convenient Scratchpad)	185
Filer Commands	186
Command Syntax and Semantics	187
Access	190
Bad sector	192
Change	193
Duplicate	195
Extended directory	196
Filecopy	199
Get	202
Krunch	203
List directory	205
Make	207
New	209
Prefix	210
Quit	212
Remove	213
Save	215
Translate	216
Unit directory	218
Volumes	220
What	221
Zero	222

Chapter 5: Pascal Compiler

Introduction	225
Steps In Program Development	226
Prepare the Source Program	226
Invoke the Compiler	226
If There Are Syntax Errors	227
Interpreting the Compilation Listing	228
Running the Compiled Program	229
Using a Workfile	229
Elementary Debugging	230
Compiling with Debugging Enabled	232
Re-running a Program with the Debugger On	232
Exiting the Debugger	234
More Advanced Operations	235
Alternative Uses for Main Memory	235
Modules	237
What Can Go Wrong?	247
Can't Run the Compiler	247
Errors 900 thru 908	247
Errors When Importing Library Modules	248
Not Enough Memory	248
Insufficient Space for Global Variables	249
Errors 403 thru 409	249
Compiler Directives	249
ALIAS	250
ANSI	251
CALLABS	252
CODE	253
CODE_OFFSETS	254
COPYRIGHT	255
DEBUG	256
DEF	257
HEAP_DISPOSE	258
IF	259
INCLUDE	260
IOCHECK	261
LINENUM	262
LINES	263
LIST	264
OVFLCHECK	265
PAGE	266
PAGewidth	267
PARTIAL_EVAL	268
RANGE	269
REF	270
SAVE_CONST	271

SEARCH	272
SEARCH_SIZE	273
STACKCHECK	274
SWITCH_STRPOS	275
SYSPROG	276
TABLES	277
UCSD	278
System Programming Language Extensions	279
Absolute Addressing of Variables	279
Error Trapping and Simulation	279
Determining the Size of Variables and Types	280
Relaxed Typechecking of VAR Parameters	281
The ANYPTR Type	282
Determining the Absolute Address of a Variable	282
Procedure Functions and the Standard Procedure CALL	283
The IORESULT Function	283
IOchecks and IOresults	284
Heap Management	288
MARK and RELEASE	288
DISPOSE	288
Mixing DISPOSE and RELEASE	290
Converting UCSD Pascal programs	291
Supported Features of UCSD Pascal	291
Some Useful Hints	294
How Pascal Programs Use the Stack	298
The Pascal Stack	298
Global Variables	298
Procedure Calls	299
Function Calls	300
Parameter Passing Mechanisms	300
Function Results	301
Implementation Restrictions	306
Input to the Compiler	306
Nesting of INCLUDE Files and IMPORT Declarations	306
Module Names Used by the Operating System	306
Maximum Size of Local and Global Data Areas	307
Implementation of CASE Statements	307
Range of Real and Integer Numbers	308
16-bit Subranges	308
String Length	308
Ordinal Range of Sets	308
Declared Record Length	308
Deviations from HP Standard Pascal	309
Known Deviations	309
File System Differences	309
Unreported Errors	310

Chapter 6: The Assembler

Introduction	311
Operating the Assembler	312
Invoking the Assembler	312
Source File Specification	312
Listing File Information	312
Object File Specification	313
Interpreting the Listing	314
The Programming System	315
The IMPORT Text	316
The DEF Table	316
The EXT Table	317
Declaring the Module Name	318
Passing Parameters	318
Declaring Global Variables	319
Referencing Global Variables	319
Referencing Other Module's Globals	320
Local Variables	320
Module Initialization	323
Error Recovery	323
Exception Coding	325
Returning to Pascal	325
Declaring External Procedures	326
Instruction Format	327
In General	327
Symbols	327
Opcodes	327
Size Suffixes	327
Expressions	328
Addressing Modes	328
Pseudo-Op Language Reference	332
COM	333
DC	334
DECIMAL	335
DEF	336
DS	337
END	338
EQU	339
INCLUDE	340
LLEN	341
LIST	342
LMODE	343
LPRINT	344
MNAME	345
NOLIST	346
NOOBJ	347
NOSYMS	348
ORG	349

REFA	351

REFR	352
RMODE	353
RORG	354
SMODE	355
SPC	356
SPRINT	357
SRC	358
START	359
TTL	360
The Examples	361
The Sample Pascal Programs	361
The Sample Pascal Module	362
The Disassembly of the Module	363
The Assembly Language Module	365

Chapter 7: The Librarian

Introduction	369
Entering the Librarian	369
Before We Get Started	370
Libraries	370
Getting Started	371
Creating Libraries of Object Modules	372
Making a User Library	372
Annotated Example Programs for this Chapter	374
Storing Modules in LIBRARY	376
Linking Object Files Together	377
Getting Detailed Object File Information	379
The Text and Table Commands	381
The Unassemble Commands	382
Creating a New Boot File	383
Librarian Command Reference	384
Glossary of Object Code Terminology	386
DEF table (definition symbol table)	386
Define Source	386
EXT Table (EXTERNAL Sysbol Table)	386
EXPORT	387
Flags	388
General Value or Address Record (GVR)	389
IMPLEMENT	389
IMPORT	389
Librarian	389
Object File	390
Object Module	390
Pascal Module	390
REF tables	390
Reference Pointer	391
LIBRARY	391
Text Record	391

Chapter 8: The Debugger

Introduction	393
Sample Session	394
Getting Started with the Debugger	394
Code File Specification	394
The Debugger Prompt	394
Controlling Execution with Breakpoints	395
Deactivating Breakpoints	395
The Breakpoint Table	396
Reactivating Breakpoints	396
Clearing Breakpoints	396
Executing a Specified Number of Statements	396
Execution Control Keys	397
A Note Concerning Assembly Language Programs	398
Display Commands	398
Examine Consecutive Memory	400
Display Formats	401
Formats for Structured Variables	402
Default Formats	403
Change Memory	404
Static and Dynamic Links	404
Exception Trapping	406
The Debugger as a Calculator	407
Debugger Keyboard	408
The Debugger Command Summary	410
The Debugger Language Reference	412
Expressions	412
Breakpoint Commands	413
Display Commands	416
Escape Code Trapping	418
Format Commands	419
Go Commands	420
Open Memory Commands	422
Procedure Exit Command	423
Queue Commands	424
Register Operations	425
Softkey Commands	426
System Boot	427
Trace Commands	428
Walk the Procedure Links	430
The Sample Program	431

Technical Reference

Pascal 1.0 and 2.0 Differences	434
Peripheral Configuration	434
File System	434
Object Code Compatibility	435
IO Drivers	436
New Peripheral Support	436
Supervisor Vs. User State	436
Global Space	436
CS/80 Tape Backup	437
The Tape Backup Utility	437
The Medium-copy Operation	438
The Verify Operation	439
The Certify Operation	439
Using the Filer for "Direct" Tape Access	440
Avoid Large Directories on the Tape	440
Avoid Transferring Small Files	440
Volume Backup	440
Advantages to Selective Backup and Retrieval	441
Special Configurations	442
Commentary on the CTABLE Program	443
Modifying module OPTIONS	444
About module CTR	447
About module BRSTUFF	448
About module SCANSTUFF	448
Discussion of the main body of CTABLE	448
An Example Configuration	450
Mass Storage Setup	451
Editing CTABLE	452
Compiling and Running CTABLE	454
Verifying the New Configuration	454
Making the New Configuration Permanent	454
Hard Disc Partitioning	456
Summary	457
Reserved Module Names	457
Physical Memory Map	458
Addressing Range	458
A Hypothetical RAM Configuration	459
The Overall ROM Memory Map	460
Memory Mapped I/O	461
External I/O	461
Internal I/O	462

The Software Memory Map	463
I/O Register Descriptions	464
The Keyboard Registers	465
The Internal Disc Registers and Buffer RAM	467
The Battery Back-up Registers	470
The HP-IB Registers	471
The CRT Registers	475
Alpha and Graphics Screen RAM	480
ASCII Tables	481
U.S. ASCII Character Set	482
European Display Characters	484
Katakana Display Characters	486
9836 CRT Highlight Characters	488
 Command Summary	
Main Command Level Summary	489
Editor Command Summary	490
Filer Command Summary	491
Librarian Command Summary	492
Debugger Command Summary	493
 Glossary	495
 Error Messages	
Operating System Run-Time Error Messages	507
Input/Output Related Errors	508
I/O Library Errors	510
Graphics Errors	511
Pascal Compiler Syntax Errors	512
ANSI/ISO Pascal Errors	512
Compiler Directives	514
Implementation Restrictions	515
Non-ISO Language Features	516
Assembler Errors	517
Debugger Error Messages/Conditions	519
 Index	521
